

LAZER **Sunlite**

SUNBURST

Combination Light Source and Curing Light ... For About the Cost of a Curing Light Alone!

The Sunlite system makes so much sense that it is truly a revolutionary concept. The ultra-small power pack will run four fiber optic handpieces of any brand ... even different brands on the same unit! PLUS, you get a powerful, rapid cure LED curing light that feels exactly like a handpiece, conveniently stores on your dental unit and is controlled using your foot pedal ... just the way you like to work. What could be more natural?

Using either SunliteLAZER or SunBurst, the curing light is always at your fingertips ... right in front of you on your delivery unit, where it belongs. You never have to search for it, worry about low battery power or find some space on your cluttered counter top. Sunlite is supplied with a built-in variable output handpiece light source, LED curing light and your choice of tubing style ... ALL for about the cost of a curing light alone !!

Both SunliteLAZER and SunBurst are high intensity curing lights capable of rapid polymerization in less than 10 sec. SunliteLAZER features all stainless steel construction that is autoclaveable and the entire body swivels 360 degrees for ultimate convenience. SunBurst is constructed using a new titanium filled polymer and is more economical.

- * Costs less than an average curing light alone
- * Installs directly onto dental delivery unit
- * Brilliant pure white light for any handpiece
- * Choose either rapid cure LED curing light
- * Operates conveniently with unit foot control
- * SunliteLAZER is completely autoclaveable
- * Audible 10 second cycle timing tone
- * SunBurst can be activated using pushbutton

Multiple Handpiece Light Source

The **Sunlite** light source power supply not only produces the necessary power requirements for the chosen curing light but also provides a four circuit universal variable handpiece light source. Using the appropriate tubing connection, each of the four light sources are capable of connecting to either ISO-5H or ISO-C 6-pin handpieces. Also, the light source itself can be traditional halogen or Vari-Lux LED. Tubings are available in straight, coiled or Euro and come in 6 different colors ... gray, black, light gray, sand, surf or shadow. In addition, handpiece nuts can be matched to the tubing color and are available in gray, sand, black and stainless steel.

- Traditional ISO-B 5-Hole or ISO-C 6-Pin Connections
- Compatible With All Brands of Fiber Optic Handpieces
- Straight, Coiled or Round Profile Euro Style Tubing
- Gray, Light gray, Black, Sand, Surf and Shadow Colors
- Variable Voltage Permits Use of Any Brand Optic Lamps

SunliteLAZER Autoclaveable Curing Light

The **SunliteLAZER** incorporates a unique quick connect that permits the entire probe to be removed from the optic housing and placed in an autoclave. In addition, the same mechanism facilitates 360 degree swivel rotation ... a highly advantageous feature for ultimate positioning convenience. As if that was not enough, the curing probe can be quickly replaced with another of a different size. The standard probe is 8mm and additional sizes are available in 11mm as well as 3mm. **SunliteLAZER** is installed so activation of the curing emitter is accomplished using the existing dental unit foot control. This configuration is ideal for providing maximum ease-of-use.

- Quick Connect 360 Degree Swivel Curing Handpiece
- High Transmission Turbo 8mm Cellular Fiber Optics
- Fourth Generation Rapid Cure Quad Chip LED Array
- Curing Probe as Well as Probe Handle are Autoclaveable
- Audible Tone at the End of Each 10 Second Interval

SunBurst Economical Curing Light

The **SunBurst** curing light may indeed be economical but it is certainly a high performance instrument. Actually, the low cost may just permit it to be installed in multiple operatories. After all, that is really how this type of curing light should be utilized. **SunBurst** produces a high intensity emission that can easily cure most composites in 5 to 10 seconds. Installed directly on your dental unit, this device is always ready when you are. It can be installed to operate from the delivery unit foot control or you can simply use the built-in pushbutton. In either case, the light source power supply is providing the electrical and logic functions while at the same time running 4 handpieces.

- Economically Viable for Use in Multiple Operatories
- Activated Using Foot control or Built-in Pushbutton
- Fourth Generation Rapid Cure Large Chip LED Array
- Sleek Elegant Design Compliments Any Dental Unit
- Audible Tone at the End of Each 10 Second Interval
