

# Vari-Lux

★ 4500°K

## Brilliant High Intensity LED White Light for Kinetic-360 Fiber Optic High Speed Handpieces

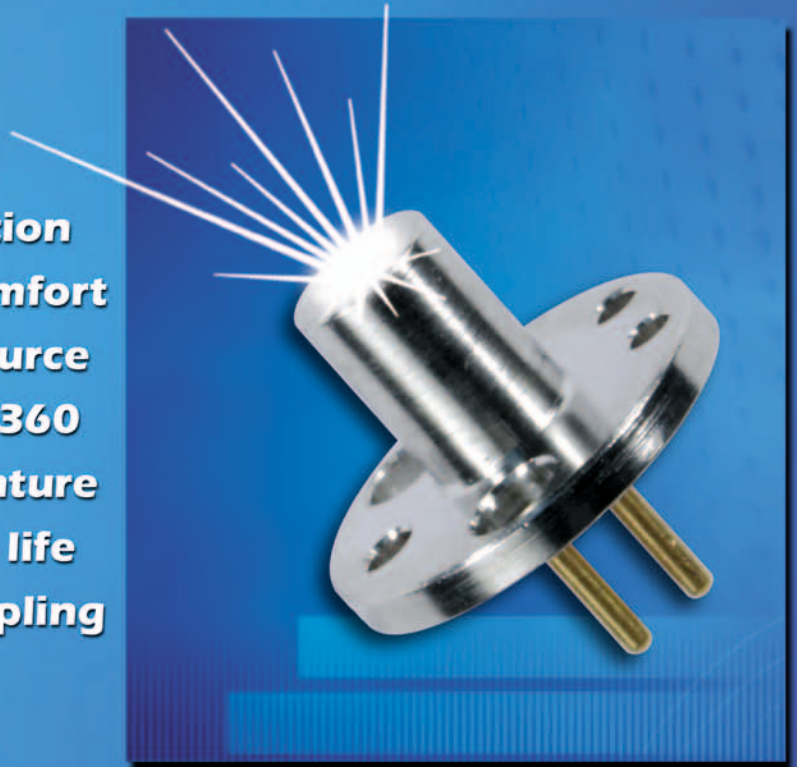

Kinetic Instruments has been designing and manufacturing light generation equipment for over 34 years in the medical and dental markets. During that tenure, we have become well known for the diversification, innovation, quality and value of our many varied product offerings.

As a developing technology, the introduction of LED lighting has virtually revolutionized varied industries such as automotive, aerospace and, most importantly, general illumination. During this evolution, we have specialized our direction toward unique and innovative applications.

Vari-Lux is the latest in a long line of products that address specific requirements from a fresh, new perspective. As the name implies, Vari-Lux provides variable intensity brilliant white light specifically for Kinetic fiber optic handpieces. As if beautifully balanced intensity weren't enough, this LED light source has an indefinite life !!!

- ★ Brilliant pure-white illumination
- ★ Variable intensity insures comfort
- ★ Compatible with any light source
- ★ Specifically designed for Kin-360
- ★ 4500°K perfect color temperature
- ★ Dynamic cooling = indefinite life
- ★ Same length as standard coupling
